

## Sharjah Architecture Triennial 2023 announces opening programme details

*The Beauty of Impermanence: An Architecture of Adaptability*

curated by Tosin Oshinowo

11 November 2023 – 10 March 2024

The second edition of the Sharjah Architecture Triennial, *The Beauty of Impermanence*, launches to the public next week with a three-day opening programme of talks, tours, screenings, workshops, and performances. Taking place from 11 to 13 November, this programme of events will immerse visitors in a dynamic, city-wide dialogue around the potential of contextual solutions, resource sharing and waste reuse to change the future of architecture and design globally.

Curated by Lagos-based architect **Tosin Oshinowo**, this edition will spotlight creative, innovative and resourceful design solutions borne from conditions of scarcity across the Global South, exemplified in the work of 29 participants. The programme will begin with a keynote conversation between **Lesley Lokko** (curator, architect and Founder of the African Futures Institute in Accra) and **Rahul Mehrotra** (Founder of RMA Architects and Professor at the Harvard Graduate School of Design), reflecting on architects and designers who have navigated contextual constraints to turn scarcity into opportunity. This recurring theme forms the basis of a major new publication which accompanies the Triennial, *Field Notes on Scarcity*, which features poems, essays and dialogues by 60 scholars and

practitioners from across the Global South and will be launched in a presentation moderated by its co-editor **Julie Cirelli**.

A series of panel talks will invite SAT participants to discuss their projects, with forums revolving around the three curatorial strands that underpin Oshinowo's theme. These include discussions around contextual-based approaches to architecture, the importance of embracing the life cycle of materials, and the socio-economic significance of dust. These will be moderated by **Matthew Barac** (Professor of Architecture & Urban Culture at London Metropolitan University), **Seetal Solanki** (Founder and Director of Ma-tt-er) and **Mpho Matsipa** (Visiting Assistant Professor at GSAPP, Columbia University), respectively.

Introducing visitors to the key venues of the Triennial, Oshinowo will lead a curatorial walkthrough at the Al Qasimiyah School, with other guided tours taking place across the weekend. These include the exhibition by **Hunnarshala Foundation**, led by founder **Sandeep Virmani**, and the installation by **Cave\_bureau** at Sharjah's Old Slaughterhouse, which reflects on states of impermanence through ambient sounds and projections. An offsite visit to the abandoned Al Madam village will also invite visitors to discover the *Concrete Tent* (2023) installation by **DAAR – Sandi Hilal & Alessandro Petti**. Originally sited at the Dheisheh refugee camp in Bethlehem, it will provide a space for shared reflection on the condition of permanent temporariness experienced by today's migrant populations and a refuge for collective mourning. The installation will be open to the public over the three days of the public programme, and will be accompanied by a three-act performance entitled *Osagbaye* (spirits occupying worldly spaces), assembled by SAT participant **Bubu Ogisi**.

Placement of wooden structural roof - "La Balsanera - Floating Productive House". Credit: © Natura Futura.

A workshop on upcycling techniques will be led by **Thomas Egoumenides**, whose installation *Ship of Theseus* (2023) harnesses the aesthetic potential of discarded materials, while **Collab: Henry Glogau & Aleksander Kongshaug**, will host a workshop on salt air filters. Focussed on low-tech, eco-conscious, and adaptable solutions, their installation *Resource Autonomy* (2023) - made up of three bamboo pavilions - will demonstrate the potential of resource creation from environmental challenges, such as using solar desalination for clean water and salt brine for air purification.

Advocating for design that embraces ecology, a lecture event will explore the connection between humans and non-human forms of life, featuring performances that incorporate sound, visuals, and the body. The Mirage City Cinema will host a screening of *Tropical Modernism: Architecture and Power in West Africa* (2023), a film offering insight into the interplay between modern architecture and colonialism in newly independent Ghana, accompanied by a panel discussion moderated by **Olorunfemi Adewuyi** (Architectural Associate at Studio Contra). **Wale Lawal** (Founder of The Republic) will also moderate a talk on the power of the imagination to re-envision the future of architecture and design.

Oshinowo commented: 'The importance of embracing context in design and architecture has informed and inspired my practice for over a decade, and I'm delighted to introduce this incredible range of practitioners who are guided by similar principles and ideas. At this critical moment for the planet and its population, I hope that visitors come away with a sense of hope and possibility as we celebrate creative, innovative and solution-orientated approaches and communities from across the Global South, and their potential to change the future of how we live.'

Other speakers over the course of the three-day programme will include **Esra Akcan** (Professor of Architectural Theory at Cornell University), **Vartan Avakian** (artist), **Nana Biamah-Ofosu** (architect and Lecturer at Kingston University), **Sara Bokr** (architect), **Ester Carro** (architect), **Aziza Chaouni** (architect and Associate Professor at University of Toronto), **Beatriz Colomina** (architecture historian), **Oyindamola Fakeye** (curator and Director at the Centre for Contemporary Art, Lagos), **Hélène Frichot** (Professor of Architecture and Philosophy at Melbourne School of Design), **Elahe Karimnia** (Senior Lecturer in Critical Urban Practice at UWE Bristol), **Reem Khorshid** (architect and researcher), **Marwa Yousif Koheji** (Postdoctoral Fellow at New York University Abu Dhabi), **Raafat Majzoub** (architect, author and artist), **Bushra Mohamed** (architect and Director of Msoma Architects), and **Adeyemo Shokunbi** (architect and Director at PatrickWaheed Design Consultancy).

The opening programme is free and open to the public. You can access the full schedule [here](#). Please note that tours and workshops may need to be booked in advance.

## Notes to Editors

### About Sharjah Architecture Triennial

Founded in 2018 by Khalid Al Qasimi, Sharjah Architecture Triennial (SAT) is a platform for architecture and urbanism in a region that extends from West Asia to South Asia and the African continent. Physically anchored in Sharjah and the United Arab Emirates, SAT aims to engage diverse audiences and stakeholders in a collective conversation on architecture at the neighbourhood, city, and regional levels. Institutional research and programming support on-going critical reflection through exhibitions, publications, and public programmes in tandem with its international editions. SAT is committed to pursuing a multi-disciplinary approach that fosters an understanding of the broader role of architecture, including its relation to social and environmental issues.

### About *Field Notes on Scarcity*

A major new publication, *Field Notes on Scarcity*, accompanies this edition of the Triennial, with newly commissioned, fully illustrated writings that offer readers an insight into what scarcity looks like and the challenges and opportunities it presents. Revealing diverse solutions beyond the built environment, 60 scholars and practitioners from across the Global South—including Lesley Lokko, Yinka Shonibare, Formafantasma, Rahul Mehrotra, Olalekan Jeyifous, Abeer Seikaly, Ilze and Heinrich Wolff, Chitra Vishwanath, Deema Assaf, and many others—contribute reflections, poems, visual essays, and dialogues exploring what scarcity represents. The publication is edited by Tosin Oshinowo, curator of this edition of the Triennial, and Julie Cirelli, a Stockholm-based American journalist and editor specialising in architecture and design. *Field Notes on Scarcity* can be pre-ordered [here](#).

### Tosin Oshinowo

SAT02 Curator Tosin Oshinowo is a Lagos-based Nigerian architect and designer. The founder and principal of Oshinowo Studio (formerly cmDesign Atelier), which she formed in 2013, Oshinowo has worked on a number of civic, commercial and residential projects throughout Nigeria. She is renowned for her insights into socially responsive approaches to architecture, design and urbanism.

Oshinowo's key designs include a project with the United Nations Development Programme to build an entirely new community in northern Nigeria for a village displaced by Boko Haram, and the Maryland Mall in Lagos. Her work spans into the conceptual sphere, demonstrating a strong interest in architectural history while embodying a contemporary perspective on the next generation of African design, innovation, and afro-minimalism. She partnered with Lexus on conceptual design explorations for Design Miami/ 2020 and co-curated the second Lagos Biennial in 2019.

Oshinowo is a registered Architect in the Federal Republic of Nigeria and a member of the Royal Institute of British Architects. Before founding Oshinowo Studio, she worked in the offices of Skidmore Owings & Merrill in London and the Office of Metropolitan Architecture Rotterdam, where she was part of the team that designed the 4th Mainland Bridge proposal in 2008. Upon returning to Lagos, she practised at James Cubitt Architects and led on notable projects, including the corporate head office building for Nigeria LNG in Port Harcourt. She has a BA in Architecture from Kingston University, London; an MSc in Development and Planning: Building and Urban Design in Development, University College London; an AA Diploma from the Architecture Association London and a Masters in Business for Architecture and Design from IE University, Madrid.

### **Hoor Al Qasimi**

Hoor Al Qasimi is the President, Director and Curator of Sharjah Art Foundation which she established in 2009 as a catalyst and advocate for the arts in Sharjah, UAE, as well as regionally and internationally. With a passion for supporting experimentation and innovation in the arts, Al Qasimi has continuously expanded the scope of the Foundation over its 10-year history to include major exhibitions that have toured internationally; artist and curator residencies in visual art, film and music; commissions and production grants for emerging artists; and a wide range of educational programming in Sharjah for both children and adults. In 2003, Al Qasimi co-curated Sharjah Biennial 6 and has since continued as Biennial Director.

Under Al Qasimi's leadership, the Sharjah Biennial has become an internationally recognised platform for contemporary artists, curators and cultural producers. Her leadership in the field led to her election as President of the International Biennial Association (IBA) in 2017, an appointment that transferred IBA's headquarters to Sharjah. Complementing her role at the Foundation, Al Qasimi also serves as the President of The Africa Institute and President of the Sharjah Architecture Triennial, which inaugurated its first edition in November 2019. Al Qasimi served as curator of the second Lahore Biennale, which opened in January 2020 across the city of Lahore, Pakistan.

Al Qasimi serves on the Board of Directors for Kunst-Werke Berlin e. V. in Germany and Ashkal Alwan in Beirut, Lebanon. She is the Chair of the Advisory Board for the College of Fine Arts and Design at the University of Sharjah and is a member of the advisory boards for Khoj International Artists' Association, New Delhi, India and Darat al Funun, Amman, Jordan.

### **51-1 Arquitectos**

51-1 Arquitectos is an architecture studio based in Lima, Peru, led by Cesar Becerra, Fernando Puente Arnao, and Manuel de Rivero. Since its founding in 2005, the studio has been involved in numerous projects, including housing, public buildings, urban design, hospitality projects, and other research projects. It has received several major awards and recognitions, including four nominations for the Mies Crown Hall Americas Prize. Notably, the studio won the international competition to extend the Medellin Museum of Modern Art in Colombia in 2015. Their portfolio also spans projects across Peru, Ecuador, Russia, and the UAE, including Sharjah Art Foundation's 2023 Kalba Ice Factory Cultural Centre. In addition to their architectural work, 51-1 Arquitectos has actively engaged in teaching and lecturing at various events and universities. They were selected as curators for the II Architecture Biennial of Lima, scheduled to be held in October 2023. The studio is also a member of Supersudaca, an international collective focused on urban research.

### **Adrian Pepe**

Adrian is a fibre artist presently based in Beirut, Lebanon. Pepe's artistic practice is an ongoing investigation on material and process. Through his work, he interweaves nature and culture to create objects as tools to enable an open discourse on materiality, our morphing cultural landscape, and our present condition. His most recent and upcoming solo and group exhibitions include Luxembourg Art Week with Galerie La La Lande in Luxembourg (2023). "Fibra" at Extant Fair in Mallorca, Spain (2023); "Fragments of Time Unending" at Nika Project Space, Dubai, UAE (2023); "In/Un Becoming" with Eindhoven Design Week (2022); "Lost in the Right Direction" with Art Design Lebanon in Beirut, Lebanon (2022). He was selected as a DieDas Fellow in Saaleck, Germany (2022) and participated in artistic residencies including TADA Residency in St Gallen, Switzerland (2023), Intermix in Riyadh, Saudi Arabia (2023), and a Shepherd residency with Mutur Beltz in Karrantza, Spain (2023).

### **Al Borde**

Al Borde is an architecture firm established in Quito, Ecuador, in 2007, by Pascual Gangotena, David Barragán, Marialuisa Borja, and Esteban Benavides. With a focus on promoting local development, social innovation, and sustainability, their architectural approach transforms limited resources into aesthetic opportunities, prioritizing both location and community engagement. The firm has earned global recognition, receiving numerous prestigious awards including the Holcim Award Acknowledgement Latin America (2014), the Global Award for Sustainable Architecture in Paris (2013), and the Schelling Architecture Prize in Germany (2012). Al Borde's innovative work has been prominently showcased in significant exhibitions like the Seoul Biennale of Architecture and Urbanism (2021) and the Venice Architecture Biennial (2016). Their projects have garnered attention in various publications, including the monograph *Less is All* (2020), and they also co-produced the documentary film *Do More with Less* (2018). Currently, the firm is engaged in producing a docu-series that delves into the cultural, environmental, social, economic, and political contexts surrounding their projects.

### **The Art and Culture Development Foundation (ACDF)**

The Art and Culture Development Foundation (ACDF) under the Cabinet of Ministers of the Republic of Uzbekistan was established in 2017 by the decree of President Shavkat Mirziyoyev. It fosters international cooperation and promotes Uzbekistan's culture on the global stage. Its objective is to showcase the national heritage through projects encompassing fine arts, architecture, literature, theatre, music, craft, design, and dance. The Foundation's mission is to create an inclusive and accessible environment within the country's cultural institutions, contribute to museum renovations, and develop cultural patronage and professional training for the arts and culture sector. Among its long-term projects is the reconstruction of the State Museum of Art in Tashkent, along with organizing exhibitions at the Louvre Museum and the Arab World Institute in Paris, as well as at the James Simon Gallery in Berlin. The Foundation holds the distinction of being the commissioner of Uzbekistan's first National Pavilion at the Venice Biennale.

### **Asif Khan Studio**

Asif Khan founded his London-based practice in 2007, which designs buildings, landscapes, installations, exhibitions and objects. His work is concerned with sensory experience, craftsmanship, cultural exchange and the merging of history with future worlds. His interests span sites of complex narratives, community empowerment and questions of identity. In 2020 he completed 6.5 linear kilometres of public realm design for Dubai Expo 2020, where his carbon-fibre Entry Portals received the Dezeen public award 2021 and nomination for the Aga Khan award for Architecture. Khan was awarded an MBE for Services to Architecture in 2017 and currently serves as Vice Chairman of the Design Museum in London. Current projects include the Barbican Art Centre Renewal, the new London Museum, and the Museum of the Incense Road in Al-Ula. His works have been exhibited at the Royal Academy of Arts, Milan Salone, Milan Triennale, London Design Week, Tokyo Design Week, and MAAT Lisbon.

### **Bubu Ogisi**

Bubu Ogisi is a fibre research artist and creative director of the contemporary art brand, IAMISIGO. Her work revolves around the idea of how the body exists and interacts with space through time. Ogisi fuses tradition with a contemporary design aesthetic, by utilizing unconventional materials and ancient textiles techniques from her heritage. Her work aims to decolonise and free the mind through manipulating gravity, light, colour, mass, and transparency to demonstrate the infinite transformations and iterations of materiality. Engaging with socio-political themes such as spirituality, gender, and future ecosystems, her work conveys lost stories through abstract space installations, textile art, and moving visuals by exaggerating texture, structure and space she is able to break and transform the rules and expectations of what textiles are into transient humanity. Born in Lagos, Nigeria, and now

based between Lagos and Nairobi, Ogisi studied Fashion at the prestigious Ecole Supérieure des Art et technique de la Mode (ESMOD) Paris, France.

#### **BUZIGAHILL**

Founded by Bobby Kolade, BUZIGAHILL is a Kampala-based clothing brand that works between art, fashion, and activism. For their first project series called RETURN TO SENDER, BUZIGAHILL redesigns second-hand clothes and redistributes them to the Global North, where they were originally discarded before being shipped to Uganda. Kolade was born in Sudan to Nigerian-German parents and grew up between Kampala and Lagos. He holds a master's degree in Fashion Design from the Academy of Arts Berlin Weissensee and has previously worked at Maison Margiela and Balenciaga in Paris.

#### **Cave\_bureau**

Cave\_bureau, founded and directed by Kabage Karanja and Stella Mutege, is a Nairobi-based bureau of architects and researchers charting explorations of architecture and urbanism within nature. Their work addresses the anthropological and geological context of the postcolonial African city, explored through drawing, storytelling, construction, and the curation of performative events of resistance. By conducting playful and intensive research studies of caves in Nairobi and around the world, they aim to navigate a return to the curiosity of our early ancestors while confronting the challenges of contemporary rural and urban living. Past exhibitions include the Architect's Studio exhibition at the Louisiana Museum 2023; The 18th International Architecture Exhibition, Venice 2023; The 17th International Architecture Exhibition, Venice 2021, which received a Special Mention for the installation titled "Obsidian Rain"; The World Around Summit, Guggenheim Museum, 2021; Cooper Hewitt Design Triennial, 2019-20; and the London Festival of Architecture 2018.

#### **Collab: Henry Glogau and Aleksander Kongshaug**

Henry Glogau and Aleksander Kongshaug are architects based in Copenhagen, Denmark. Together they studied at Royal Danish Academy, specializing in Architecture within Extreme Environments and delving into the potential of design to tackle current and future global challenges. Their collaboration is founded on their shared passion and driven by a 'research by design' approach. Glogau and Kongshaug engage with the world through expeditions to diverse and extreme locations, exploring the interconnected relationships between design, technology, people, and the environment at various scales. Notably, their work addresses resource scarcity and embraces low-tech and passive ideas. Their projects adopt an open-source and design-for-distribution approach, aiming to learn from local contexts and share globally. They strive to foster connections and collaborations across borders, encouraging people to engage in parallel environments. In addition to their collaborative work, Glogau and Kongshaug work as architects at GXN, an innovation and research firm based in Copenhagen.

#### **DAAR – Sandi Hilal and Alessandro Petti**

The artistic research practice of DAAR – Sandi Hilal and Alessandro Petti – is situated between architecture, art, pedagogy, and politics. Over the last two decades, they have developed a series of research-projects that are both theoretically ambitious and practically engaged in the struggle for justice and equality. In their artistic research practice, art exhibitions are both sites of display and sites of action that spill over into other contexts: built architectural structures, the shaping of critical learning environments, interventions that challenge dominant collective narratives, the production of new political imaginations, the formation of civic spaces and the re-definition of concepts. DAAR has participated in multiple editions of the Venice Biennale (2003-2021), the Berlin Biennale (2022), the Istanbul Biennial (2009), the São Paulo Biennial (2014) and the Marrakesh Biennial (2016), among others. Recent major retrospective exhibitions have taken place at the Van Abbemuseum in Eindhoven.

(2019), Mosaic Room in London (2022), and La Loge in Brussels (2023). Their artistic practice has been awarded The Keith Haring Fellowship in Art and Activism at Bard College and The Golden Lion for Best Participation at the 18th International Architecture Exhibition – La Biennale di Venezia, for their long-standing commitment to deep political engagement with architectural and learning practices of decolonization in Palestine and Europe.

#### **Dia Mrad**

Dia Mrad is a Lebanese visual artist based in Beirut. Intersecting his training in Architecture (MArch) with a documentary photographic approach, Mrad tracks shifts in the built environment to uncover hidden narratives of human activity embedded within the materiality of cities. Mrad believes architecture shapes our collective memory, storing and reflecting historical moments that influenced the development of our identity and its transience. By framing, isolating and decoding elements in the urban sphere, he identifies landmarks that encapsulate a place's political, ecological, economic, and social dynamics, stimulating reflection on contemporary societal challenges. His practice focuses on the material urban landscape as a site of socio-political and economic phenomena. Mrad trained at The Holy Spirit University of Kaslik in Lebanon and has exhibited in Lebanon and internationally in the US, Brazil, Europe, Dubai, and Saudi Arabia.

#### **Formafantasma**

Formafantasma is a research-based design studio investigating the ecological, historical, political and social forces shaping the discipline of design today. The studio was founded in 2009 by Andrea Trimarchi and Simone Farresin to facilitate a deeper understanding of both our natural and built environments and to propose transformative interventions through design and its material, technical, social and discursive possibilities. Working from its studio spaces in Milan (Italy) and Rotterdam (The Netherlands), the practice embraces a broad spectrum of typologies and methods, from product design through spatial design, strategic planning and design consultancy. Formafantasma was awarded the Wallpaper\* Designer of the Year in 2021. Trimarchi and Farresin have lectured widely, and their work has been presented and published internationally and acquired by institutions including MoMA, NY; V&A, London; and the Centre Pompidou, Paris.

#### **Hive Earth**

Hive Earth is a multi-disciplinary space based in Accra, Ghana, co-founded by Christian Kwame Deheer in 2017. The studio comprises architects and designers who specialize in using locally sourced and eco-friendly materials for construction, interior decor, art, and design. Drawing from African tradition and by using local and natural materials, the studio explores the innovative and sustainable potential of earth. In particular, the studio has conducted extensive research into building multiple structures with rammed earth – a combination of earth, gravel, silt, clay, and lime/cement – as well as agro-waste. Recent projects by the studio include an unstabilized rammed earth library with NGO Archifair, and a four-storey office block in Accra with Adjaye Associates.

#### **Hunnarshala Foundation with Aabhat and AINA**

The Hunnarshala Foundation is an Indian NGO that engages with community empowerment, artisan training, and developing traditional building systems that distinctly utilise earth. The Foundation was established by Sandeep Virmani with colleagues in the wake of the 2001 earthquake in Kutch. Virmani, a trained architect, has lived and worked in Kutch with indigenous communities for over three decades. The Foundation looks to merge innovation with traditional techniques, resulting in resilient and eco-friendly buildings rooted in the local context.

Hunnarshala has also promoted AINA and Aabhat, two next-generation companies that work together to empower communities through design and sustainable construction. Virmani has also set up Sahjeevan, which has enabled

marginalised communities to regenerate and conserve ecologies and reinvigorate their livelihoods, including conserving traditional water management systems, wildlife and crop seed conservation, pastoralism and organic farming. Virmani looks to painting, storytelling, yoga and the fascinating world of insects to fuel his forays at work.

#### **Limbo Accra**

Limbo Accra is a collaborative spatial design practice founded in 2018 by Dominique Petit-Frère and Emil Grip, to work on architectural and urban design projects and public art installations. Much of their work emerges from research, interdisciplinary engagement, and experimentation with the aesthetics and cultural significance of unfinished, decaying concrete structures in West African cities. Inspired by the principles of inclusivity, otherness, and futurity, Limbo Accra often works with other creative disciplines in the formation of innovative and intuitive approaches to new design opportunities. Limbo Accra has exhibited across Europe, and recently worked on the design for Virgil Abloh's Freedom Skatepark in Ghana. The practice was a recipient of the inaugural Black Design Visionaries program granted by Instagram Design, Meta Open Arts, and the Brooklyn Museum in 2021, and won the Monocle Design Awards in 2022. In 2023, it was awarded the prestigious grant from The Obel Foundation to support the development of Africa's first digital archive of incomplete brutalist structures.

#### **Miriam Hillawi Abraham**

Miriam Hillawi Abraham is a multi-disciplinary designer from Addis Ababa, Ethiopia. With a background in architecture, she works with digital media and spatial design to interrogate themes of equitable future and intersectionality. Her work aims to conserve and reimagine immaterial knowledge systems from the African continent, striving for their continuation into the digital future. Abraham holds an MFA in Interaction Design from the California College of the Arts and a BArch in Architecture from the Glasgow School of Art. She previously worked as a game design instructor at Bay Area Video Coalition's youth program for over three years. She is now a Mellon researcher for the Canadian Centre for Architecture's Digital Now multidisciplinary research project. Abraham's work was recently featured in the 18th International Architecture Exhibition of La Biennale di Venezia as part of the Special Project "Guests from the Future", curated by Lesley Lokko.

#### **Natura Futura**

Natura Futura is a practice from Babahoyo, Ecuador, founded by José Fernando Gómez Marmolejo in 2015. The practice aims to question sensitive issues of architecture in Latin American cities, searching for solutions through continuous experimentation and research. It prioritizes the importance of working with contextual architecture, without forgetting the human context of its projects and understanding the emotional aspects of their inhabitants, traditions, and customs. Natura Futura's portfolio consists of various community-based and public projects across Ecuador. The studio was awarded at the Quito Pan-American Biennial in addition to the three Quito Biennial awards in 2020, and Vienna's Brick Award in 2022. They have previously held exhibitions at both the Architecture Festival in Bali, Indonesia, and Valparaíso, Chile.

#### **Nifemi Marcus-Bello**

Nifemi Marcus-Bello is a designer based in Lagos, Nigeria, and the founder of the nmbello Studio. Known for its community-led, ethnographic-conscious design approach. The studio centres on core values of innovation, usability, and sustainability, adopting local materials and processes. This enables Marcus-Bello to pursue new forms and typologies in the creation of unique products, forms, and experiences, and he has a particular interest in both manufacturing and production availability, habits, and history. Marcus-Bello has received awards such as the Emerging Designer of the Year at the Monocle Design Awards in 2023; the Hublot LVMH Design Prize in 2022; and the "Life Enhancer of the Year" award by Wallpaper\* in 2021. He graduated from the University of Leeds with

Bachelor's and master's degrees in Product Design and received the "Potential for Social Change" award from the University. He has lectured at the Columbia Graduate School of Architecture and the Design Academy of Eindhoven.

#### **Ola Uduku and Michael Collins**

Ola Uduku is Head of Liverpool School of Architecture. Her research specialisms include modern architecture in West Africa, the history of educational architecture in Africa, and contemporary issues related to social infrastructure provision for minority communities in the 'West' and 'South'. She promotes the documentation and recording of Modernist Buildings and Landscapes (Docomomo) and is President of the African Studies Association, UK. She previously held academic positions at Manchester School of Architecture and Edinburgh University.

Michael Collins is an Irish architect, certified Passivehaus specialist and founder of MCA, an award-winning practice based in London. He is a lecturer at the Bartlett School of Architecture, and course co-lead of the emergent cities MSC at ESALA. Michael is a trustee of Letchworth Garden City and chairs the city urban design and placemaking group. He is a PhD candidate at The University of Cambridge and studied at the Edinburgh College of Art, ETSAB Barcelona and the University of Edinburgh.

#### **Olalekan Jeyifous**

Olalekan Jeyifous is a Brooklyn-based artist widely recognized for his inventive design practice that explores the relationships between architecture, community and the environment. He holds a BArch from Cornell University and has showcased his artwork at institutions including The Museum of Modern Art, New York; Studio Museum in Harlem; Vitra Design Museum, Rhein; and the Guggenheim Museum, Bilbao. His work is also in the permanent collection of the Museum of Modern Art's Architecture and Design Department. Jeyifous has created large-scale installations for a variety of public spaces and was co-commissioned to design a monument for congresswoman Shirley Chisholm as part of the City of New York's "She Built NYC" initiative. He has received numerous awards for his artistic practice, including the notable Silver Lion for a promising young participant at the 2023 Venice Architecture Biennale and a Fellowship from the United States Artists. He also served as a Wilder Green Fellow at the MacDowell Colony and completed artist residencies at the Bellagio Centre, supported by the Rockefeller Foundation, and the Drawing Centre's Open Sessions program.

#### **Papa Omotayo (MOE+ AA) and Eve Nnaji (ADD\_apt)**

Papa Omotayo (MOE+ AA) and Eve Nnaji (ADD\_apt) are a collaborating team based in Lagos, Nigeria working on a series of projects and installations focused on cultural infrastructure, ecology, and material intelligence. Papa Omotayo is an award-winning filmmaker, architect, designer, and writer. His work strongly focuses on exploring the nature of culture and its context within contemporary Nigerian and the extended African setting, locally and globally.

Eve Nnaji is an architectural designer, researcher, and writer. She is the founder of Addapt, a practice that utilizes architecture, design, and data as a tool to bridge environmental consciousness with urban development. Her research interests include urban flood mitigation strategies, bio-fabrication, and material intelligence.

MOE+ Art Architecture (MOE+AA) is an architecture, design, and artistic production practice established in Lagos, Nigeria in 2014. It aims to enhance the quality and value of design across the continent through a collaborative human and environmentally sensitive practice, one that embraces local solutions and aspirations. Focusing on context, culture, materiality, and ecology, its current portfolio within Nigeria aims to define a pragmatic African-led design process of making through engagement with the art of motifs and metaphors.

## **RUÍNA**

RUÍNA is an architecture studio founded by Julia Peres and Victoria Braga, graduates of FAU Mackenzie, in 2020. Based between São Paulo and Salvador in Brazil, the studio develops architecture, exhibition projects, furniture, buildings, construction execution, and consulting projects focused on the reuse of materials and construction waste. Peres is an architect, urban planner, and graphic artist who was part of the team for the 11th São Paulo Architecture Biennial. In 2021 she worked with FIO Assessoria on projects for the improvement of occupied buildings, together with the social housing movement MSTC. Braga is an architect, researcher, and past member of Goma Oficina, a transdisciplinary cultural association formed by architects, designers, photographers, producers and educators (2017 -2022). She is currently part of the graduate program in Archaeology and Cultural Heritage at the Federal University of Recôncavo Baiano.

## **Sandra Poulson**

Sandra Poulson is an Angolan interdisciplinary artist based between London and Luanda. Her work discusses the political, cultural, and socio-economic landscape of Angola to analyse the relationship between history, oral tradition, and global political structures. Working across genres such as documentation, collage, performance, and printmaking, she recurrently revisits the body as a liminal space for discussion, incorporating materials such as fabric, concrete, wood, and film. She is the recipient of the MullenLowe NOVA Award (2020) and the Central Saint Martins Dean's Award (2020). Poulson's work has been exhibited internationally, including the Lagos Biennial (2019), Bloomberg New Contemporaries at the South London Gallery (2021), ARCO Madrid (2021) and V.O Curations, London (2022). She was commissioned to show at the British Pavilion at the 18th International Architecture Exhibition – La Biennale di Venezia (2023), and at Bold Tendencies in London (2023).

## **Sumaya Dabbagh**

Sumaya Dabbagh is a Saudi architect and founder of Dabbagh Architects in 2008. Since training and working in the UK and Europe, her contextual designs combine a mix of influences and sensitivities towards both Western and Middle Eastern cultures. She is curious about the impact of tangible, built forms around us, and notions of memory, identity, and belonging within architecture. Recent projects include The Mleiha Archaeological Centre, which has been globally recognised for its new emerging approach to architecture in the region; The Gargash Mosque; and the design of Al-Ain Museum. Dabbagh was a founder of the RIBA Gulf Chapter, where she served as Chair (2015-2019). She won Principal of the Year at the Middle East Architects Awards and was a finalist at The Tamayouz Award for Women of Outstanding Achievements in 2019. She was also nominated for The Aga Khan Award, and her work has been featured in international publications such as Phaidon's Breaking Ground, Architecture by Women.

## **Thao Nguyen Phan**

Trained as a painter, Thao Nguyen Phan is a multimedia artist whose practice encompasses video, painting, and installation. Drawing from literature, philosophy, and daily life, Phan observes ambiguous issues in social conventions and history. She has exhibited internationally, with previous solo and group exhibitions at Tate St Ives (2022); Venice Art Biennale (2022); Chisenhale Gallery (London, 2020); WIELS (Brussels, 2020), Rockbund Art Museum (Shanghai, 2019); Lyon Biennale (Lyon, 2019); Sharjah Biennial (Sharjah Art Foundation, 2019); and Dhaka Art Summit (2018), among others. Phan was shortlisted for the 2019 Hugo Boss Asia Art Award. In addition to her work as a multimedia artist, she is co-founder of the collective Art Labor, which explores cross disciplinary practices and develops art projects that benefit the local community. Expanding her 'theatrical fields' into performance gesture and moving images, she is a 2016-2017 Rolex Protégée, mentored by performance and video artist Joan Jonas.

### **Thomas Egoumenides**

Thomas Egoumenides is a French designer and architect based in Tunis. His work focuses on the intersection of sculpture and social design, with a thoughtful approach to valuing and poeticizing waste and unwanted materials. Through collaboration with local actors and resources, he transforms and re-values discarded objects, bringing attention to their inherent qualities and worth. Rather than waiting for the recycling stage, Thomas intervenes early in the process, making minimal modifications to materials while respecting their history and current context. His creative vision involves reimagining the urban environment as a vast repository of materials and narratives, akin to a 'matéριοtheque'. By skilfully weaving and reshaping these diverse material layers, he redefines our man-made world. In 2016, Thomas co-founded the design studio Flayou, providing him with opportunities to participate in prestigious Design Weeks in Paris and Amman, alongside fellow artists and creators. Moreover, during a residency for the Dream City Art Festival in 2021, he initiated the project Rascal, an ephemeral design and upcycling research laboratory. His remarkable work caught the attention of the Sharjah Architecture Triennial in 2023, where he was selected to participate.

### **Wallmakers**

Wallmakers is an architectural practice founded by Vinu Daniel in Kerala, India, in 2007. Amid the current global crisis, Wallmakers aims to build sustainable spaces that are responsive to specific site contexts and conditions, while maintaining a balance between innovative, utilitarian designs and creating dream-like spaces. In particular, the practice places emphasis on reuse and local sourcing of natural materials such as mud and waste, to make structures that are both utilitarian and alluring. Past projects include the IHA Residence and the Pirouette House in Trivandrum, Chuzhi in Tamil Nadu and the St. George Orthodox Church in Mattancherry. Daniel completed his BArch in 2005 from The College of Engineering, Trivandrum, after which he worked with Auroville Earth Institute for the UNDP (United Nations Development Programme) post-Tsunami construction. He delivered a TED talk on his architectural vision in 2023 and his practice has achieved international recognition, including the Royal Academy Dorfman Award in 2022.

### **Nasser Golzari and Yara Sharif**

Nasser Golzari and Yara Sharif are practising architects and academics. They interrogate through their work the interlink between architecture, politics, ecology, and social justice. While they question and critique ecological inequalities, they reconstruct through design new social narratives and alternative architecture practices that challenge the Western dominant approach, calling for new aesthetics inspired by the Global South. Golzari and Sharif's collaborative research and live projects have been nominated and have won a number of awards including the 2013 Aga Khan Award, 2014 Holcim Award for Sustainable Construction, RIBA President's Award for Research 2013 and 2016 and the Civic Trust Award. They have curated several exhibitions globally including Secrets of a Digital Garden as part of the Chicago Architecture Biennial in 2019 and Berlinale in 2020 in collaboration with Riwaq. Their recent installation as part of Instant Modernism is currently on display at Qattan Foundation. They co-founded Palestine Regeneration Team (PART), a design-led research group that aims through speculative and live design projects to search for creative and responsive spatial possibilities.

### **Yussef Agbo-Ola**

Yussef Agbo-Ola, founder of Olaniyi Studio, is an architect and artist living between London and the Amazon Forest. Born in rural Virginia in a multi-heritage Nigerian, African American and Cherokee household, his work reflects hybrid identities and relationships to different landscapes, ecologies, and cultural rituals. His aim is to use diverse multidisciplinary research methods and design components to reinterpret local knowledge and its environmental importance cross-culturally. His research outcomes manifest through architectural temples, photographic

journalism, material alchemy, interactive performance, experimental sound design and conceptual writing. Agbo-Ola studied at the University of the Arts and the Royal College of Art in London. He has led art and architectural commissions for the United Nations, Institute of Contemporary Art (London), Serpentine Gallery London, TEDx East End, BBC Arts, Venice Architectural Biennials and Palais de Tokyo, among others. Agbo-Ola is an Adjunct Assistant Professor of Architecture at Columbia GSAPP where he directs an experimental design studio within the Advanced Architectural Design program.
